二、綜合測驗，請依文意選出最適當的一個選項。(35%)

Everyone usually catches a cold several times a year. Did you know the common cold is caused by one of the smallest forms of life on earth — something 14. a rhinovirus? It enters the body through a protective lining in the nose and throat, 15. a reaction in the immune system. This reaction in our body makes 16. hard for us to breathe, and our nose and throat become itchy and sore.

No one is sure why colds are more common in winter, but it has nothing to do with going outside 17. a hat or sweater or with wet hair. So, 18. your mom says, you can't get sick by not dressing properly. However, the rhinovirus is a very tough creature and can live for as long as 3 hours in a drop of water or on a 19. such as skin, a doorknob, or a glass that a sick person has sneezed on. If you touch one of these surface that has been 20., you may catch someone else's cold. If you don't want to catch the mysterious rhinovirus, then be sure to wash your hands with soap and water often, especially after being around sick people.
